Complex Problem Solving

## PROFILE

I consider myself a proactive individual who thrives on constant evolution and improvement. I believe in the importance of staying ahead and never being left behind. I am always on the lookout for solutions to the challenges I face, ensuring that I can deliver high-quality results consistently. My drive for continuous learning and adaptability helps me tackle problems efficiently and effectively, making me a reliable and resourceful professional.

## EMPLOYMENT HISTORY

Web Developer, Freelance - Beauty

Mar 2024 — May 2023

- **Design, Organization, and Execution:** Responsible for designing, organizing, and executing the project architecture using React for the frontend, Spring Boot for the API, and PostgreSQL for the database. Designed, organized, and implemented financial and accounting strategies to optimize the project.
- **Planning and Monitoring:** Planned the budget and managed the monitoring of national and international investment portfolios necessary for project development.
- **Testing:** Conducted thorough testing of the project using black box and white box testing methodologies. Implemented black box testing to evaluate system functionality without knowledge of the internal code, ensuring all inputs generated the expected outputs. Simultaneously, performed white box testing to verify logical flow and code coverage, identifying and correcting internal errors.
- **Presentation of Results:** Presented monthly results of the project's progress and performance to the client's board of directors and management, ensuring satisfaction and meeting agreed expectations.

Adaptability to New  
Technologies and Development
